

THE ANATOMY OF PERFORMANCE

Incorporating technologies such as 3D-M SHAPED SIPES and the KEVLAR FLIPPER & HYBRID SPIRAL, every detail of this high-performance tyre has been calibrated to deliver maximum control and response, on both dry roads and wet. Beyond an exhilarating drive, the POTENZA S007A will also go the extra mile with enhanced durability. Now that is the true anatomy of performance.

LOW ANGLE SIPES
DRY HANDLING
 Sipes are positioned at low angles for enhanced control, especially during cornering.

CHAMFERING
WET BRAKING
 By rounding each block, tyre deformation is prevented. This results in a flatter contact area while braking, which shortens the braking distance.

KEVLAR FLIPPER + HYBRID SPIRAL
DRY HANDLING
 A high-stiffness material is inserted into the tyre to reinforce the tyre interior and prevent excessive movements. This increases tyre sensitivity and grip, especially during high-speed driving.

WEAR LIFE
DRY HANDLING
 Each sipe is shaped into a 3-dimensional letter "M", which reinforces block stiffness and prevents unnecessary block movements when the tyre is in motion. This prolongs tyre life and provides additional control on the road.

SMOOTH RIB
DRY HANDLING WET BRAKING
 The centre rib is stiffened to improve the stability of the tyre and achieve an instantaneous response.

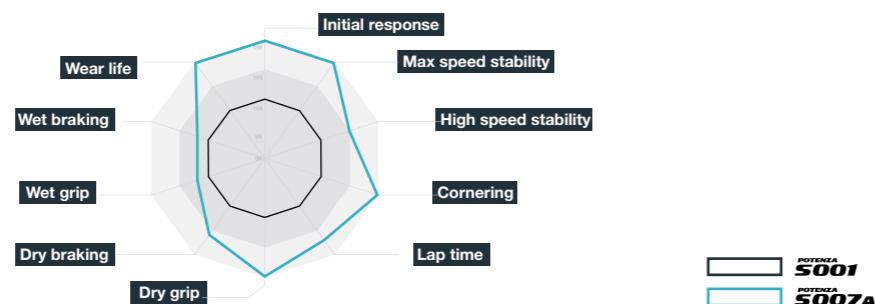

OPTIMISED STRUCTURE
WET BRAKING WEAR LIFE
 The combination of a Multi Round Block and Optimised Crown Shape ensures higher contact pressure for better grip during braking on wet roads, as well as uniform contact pressure to prolong tyre life.

PERFORMANCE COMPARISON

KEVLAR FLIPPER + HYBRID SPIRAL
 Increased grip at high speeds

OPTIMISED STRUCTURE
 Maximised grip on wet roads

3D-M SHAPED SIPES
 Prolonged tyre life
